ROSI BMS Background Music – the Convenient Playout Software

Never underestimate the power of music. Well-selected background music not only improves the feel-good atmosphere, it also increases customer loyalty.

Even Richard Wagner, a German composer, already said:

“Music is the language of passion.”

www.monacor.com

The Perfect Solution for Retail Chains, Hotels, Cruise Liners

ROSI BMS Background has already been applied successfully on almost 100 cruise liners, in hotels and numerous branch concepts and franchise concepts.

The software ROSI BMS Background features up to 6 zone players (for each computer) which allows for different PA applications in different rooms (bar, restaurant, etc.).

Forget old-fashioned methods for creating playlists - our playlists have been created using an algorithm based on musical characteristics.

The software is equipped with a program timer for each zone player. Therefore, the music can be started or stopped at any time required. You can even select individual days of the week. Furthermore, you can choose to play a certain channel at a particular time. For each zone, you can change style and genre as often as required.

650 tracks: may be used every day for up to 8 hours (a so-called "main" playlist)

300 tracks: should not be used for more than 3 hours per day and not every day

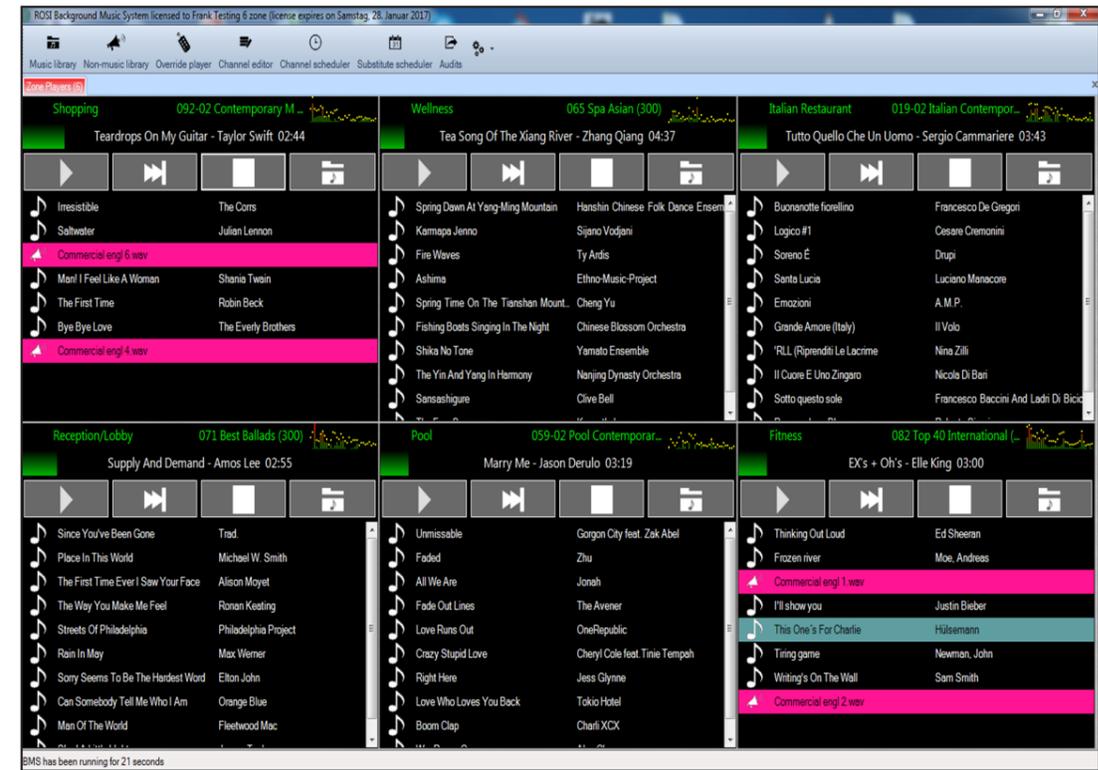

200 tracks: a "supporting" playlist. May be used as background music for a special dinner

A Complete Solution

We can supply more than just the software.

Key facts:

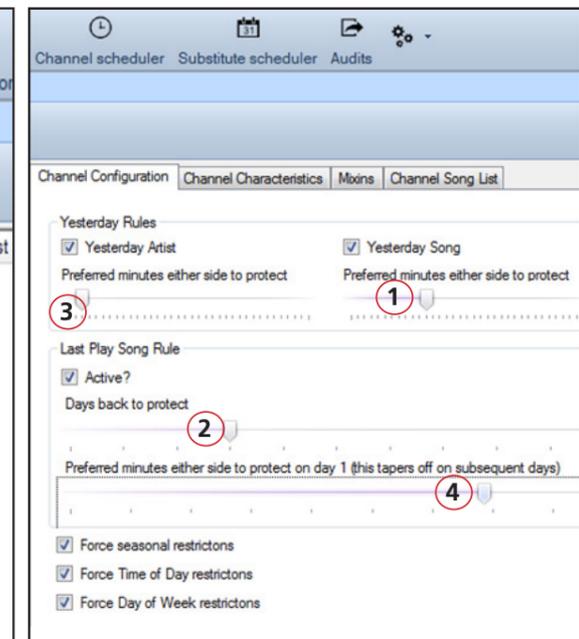

- Music database containing 750,000 tracks
- Specific properties are assigned to each track (e.g. genre, title, vocalist: male/female, language, etc.)
- Automatic Gain Control (same volume level for each track)
- Automatic crossfading between tracks
- Weekly updates of music via the Internet
- Supplied with hardware, software and music
- EBH provides more than 150 standard playlists and more than 100 channel playlists for individual projects
- Automatic voice track planning or standard announcements
- Easy-to-use and with a worldwide patent!

ROSI BMS Background – convenient to use

Display of 16 channel playlists. Each playlist can be activated for any zone at any time. Ocean liners can have up to 80 channel playlists. For your projects, please ask for our PDF file containing approx. 150 channel playlists.

Scheduling rules can be classed as the most important feature of a music software.

Rule 1 is set to 120 minutes (visible when cursor is placed on the slider). It will not be repeated "tomorrow" plus/minus 120 minutes - calculated from "now".

Rule 2 says that rule 1 is valid for 4 days instead of 1 day only (as mentioned before). This can be extended to 11 days, if required.

Rule 3 controls the artist blockade: if the track "now" is from Michael Jackson, you will not listen to any other track from Michael Jackson tomorrow (and for the next 4 days) plus/minus 30 minutes from today's time stamp "now".

Rule 4 track blockade will make sure that the same track is not played again for the next 7 hours that day. Individual values can be entered for each rule.
